

GOVERNOR TEST STANDS

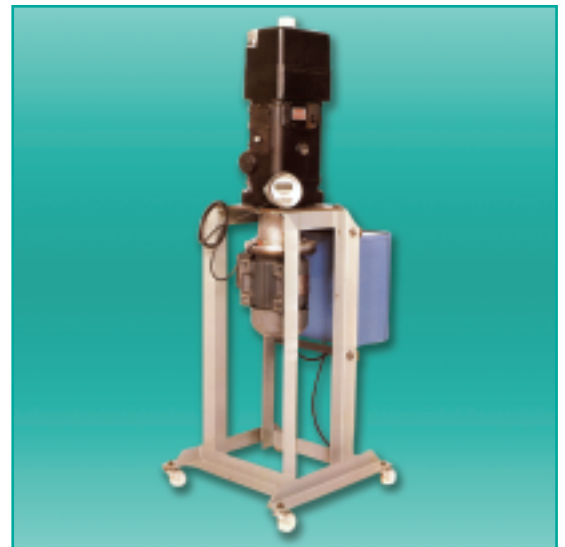

Series AK7 Mobile Variable Speed Governor Test Stand

A mobile variable speed test stand specifically designed for service personnel or fleet operators' use when access to an engine simulator test stand is not practical.

This test stand is constructed as a fabricated frame and mounted on castors allowing for ease of movement.

FEATURES

- Adjustment of speed stop setting and speed droop
- Calibration of variable speed torque control
- Calibration of fuel limit with respect to boost pressure
- Test Operational performance.

GOVERNOR TEST STANDS Series AK7
Mobile Variable Speed Governor Test Stand

SPECIFICATION

Drive Motor

0.55kW Electric Motor

Power Requirement

230V A.C. single phase 13 amp

Governor Drive Speed

100-1800 rev/min by ten turn potentiometer

Drive Shaft

Coupling to accept 3/4 " SAE serrated drive shaft and base for Regulateurs Europa 1100 governor series

Tachometer

Governor speed digital

Weight

50Kg

Optional Extras

- Drive coupling and base adaptors for other governors
- Pressure regulators and gauges for pneumatic speed setting and boost pressure.
